DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Nippon (JP 2000-302482). The products disclosed by Nippon are identical to those claimed by applicant (see Table 2 and [0038] to [0040]). In addition, the method of making the claimed product reads on the methods disclosed in the abstract, [0010], [0018], [0028], [0036] and [0037] of Nippon.

3. Claim 4 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Nippon. Nippon disclosed methods of polishing, cleaning, drying, etching and inspecting glass substrates (see abstract, [0010], [0018], [0028], [0036] to [0040] and Tables 1 and 2). Nippon reported that no defects were observed by atomic force microscopy of a 50 μ m X 50 μ m area. Applicant's claim to an absence of defects of a size of at least 3 μ m reads on the disclosure in Nippon of no noticeable defects in the field of view of the AFM.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Blin (EP629588A1) disclosed the selection of defect-free glass from a blank containing defects.
